Report Title: Case Study: <<Your Topic>>

Course Name: Big Data System Design (MBAI 5110G)

Term/Year: Winter-2026

Program: Master of Business Analytics and Artificial Intelligence (MBAI)

Lecturer/Instructor's Name: Dilli P. Sharma, PhD

Institution: Ontario Tech University

Student IDs and Name: <<Your Student ID>> |<<Your Name>>

Submission Date:

Section 1: Introduction

Briefly introduce the case and the importance of big data in modern organizations.

Include:

- Overview of the company
- Importance of big data in marketing and supply chain decisions
- Purpose of the report
- Brief outline of sections

(Page length: ~1 page)

Section 2: << Choose section heading as per your question>> (Example: Data Sources and Types)

Answer Question 1 here, relating to your case, and discuss your understanding/concept

(Page length: ~1.5 pages)

4. Section 3: << Choose section heading as per your question>>

Answer Question 2 (relating to your case)

(Page length: ~1.5 pages)

5. Section 4: << Choose section heading as per your question>>

Answer Question 3

(Page length: ~2 pages)

Section 6 : << Choose section heading as per your question>>

Answer Question 4

(Page length: ~1.5 pages)

Section 7: << Choose section heading as per your question>>

Answer Question 5

(Page limit: ~1 page)

Section 8. Conclusion

- Summarize key insights:
- Importance of big data for your case-study
- Role of AI and analytics in business decisions
- Benefits of scalable and secure architecture

(Page limit: ~½ page)

References

Use APA / IEEE / Harvard citation style.

Marking Scheme	
Item/Sections	Marks
Introduction	10
Question 1	15
Question 2	15
Question 3	15
Question 4	15
Question 5	15
Conclusion	10
References	5
Total	100

Importance Note:

For this Big Data System Design Case Study, you are expected to first discuss the questions with your group members and then prepare your report following the provided format.

While answering the questions, please focus on your assigned company/case scenario and its data environment. For example, when discussing topics such as types of data, the 5Vs of Big Data, system architecture, and analytics, explaining how these concepts apply specifically to your case organization and its operations.

Please avoid copying definitions or theory directly from textbooks, websites, or research articles. Instead, use your own understanding to explain the concepts and clearly relate them to the Big Data system design and data analytics needs of your assigned case.

Your answers should demonstrate clear understanding of Big Data concepts, logical reasoning, and thoughtful discussion about how the technologies and analytics would be used in the real-world context of your case study.

Submission File Format and Naming Conventions:

FileName: Case_Study_MBAI5110G_<<Section>><<title>>.PDF

Example: Case_Study_Report_MBAI5110G_001_Coca_Cola.pdf

Submission Due: 27 March, 2026 (End of Day)
